Practices	Clean Architecture, Microservices, RBAC, Multi-Tenant SaaS, Agile, Git

Professional Experience

Full-Stack Developer

Accorelabs (Remote)

Dec 2025 – May 2026

Dubai, UAE

- Developed reusable React.js frontend features integrated with .NET Core backend services following clean architecture principles.
- Built OCR-based invoice parsing using Tesseract for bilingual Arabic/English ZATCA-compliant invoices.
- Collaborated on REST API integration, debugging, and maintenance of enterprise-grade codebases.

Full-Stack Developer

Diffrenz Business Solutions

Feb 2024 – Nov 2025

Kerala, India

- Led frontend development for Dollar and Thrifty car rental platforms serving 10K+ monthly users.
- Rebuilt Thrifty platform from React to Next.js, improving Core Web Vitals and SEO performance through SSR.
- Shipped 5+ production features using TanStack Query, Zustand, and GitHub Actions CI/CD pipelines.

Junior Developer (Trainee)

Brototype

Oct 2022 – Jan 2024

Kozhikode, Kerala, India

- Built responsive frontend applications using React.js, JavaScript, HTML, and CSS.
- Collaborated on MERN stack projects involving REST APIs, authentication, and state management.
- Strengthened software engineering fundamentals through intensive code reviews and pair programming.

Key Projects

Thrifty UAE — Car Rental Platform

<https://www.thriftyuae.com>

Next.js, React, TanStack Query, Zustand, REST API

- Rebuilt legacy React platform to Next.js, improving SEO and page load speed through server-side rendering.
- Developed flexi-lease and subscription booking flows integrated with backend microservices.

Dollar UAE — Car Rental Platform

<https://www.dollaruae.com>

React, Redux, Zustand, REST API, GA4

- Architected modular UI integrating booking, payments, vehicle catalogue, and user account services.
- Implemented Google GA4 event tracking for conversion funnels and marketing analytics.
